

1. flask默认用的服务器: gunicorn
2. 终端运行gunicorn服务器: `gunicorn -w 4 -b 127.0.0.1:5000 --access-logfile ./logs/log main:app`
3. 后台运行gunicorn: `gunicorn -w 4 -b 127.0.0.1:5000 -D --access-logfile ./logs/log main:app`
4. nginx 配置文件: 实现负载均衡

```
upstream flask_name {  
    server 10.211.55.2:5000;  
    server 10.211.55.2:5001;  
}  
  
server {  
    listen      80;  
    server_name localhost;  
  
    location / {  
        proxy_pass http://flask_name;  
        proxy_set_header Host $host;  
        proxy_set_header X-Real-IP $remote_addr;  
    }  
}
```
